

**ABOLISH
GENDER
ABOLISH
PATRIARCHY
ABOLISH
WAR**

We don't want to be on any talkshows, be in any ads, sell any products,
star in any sitcoms or be a target market.

We want more language, more funding, more healthcare,
more small-sized suits, more research, more options.

We want more space for more creatures.

We demand safe and accessible bathrooms for people of all genders
and until then we will piss and shit wherever we want.

We are not deceiving you.

We are not mutilating our bodies.

We are not betraying y/our communities.

We are being and becoming our true, foxy and glorious selves.

We are putting the "sex back in transsexual.

We cruise men with tits, chicks with dicks, bearded ladies and
genderqueers of every species.

We want to lick your scars and make it all better.

We refuse to check either box.

We are guaranteed to stay hard all night long and not get you pregnant.

We bat for all teams—we bat for the whole fucking league.

We will keep crashing your events, your potlucks; your bathhouses, your dyke
and your fag bars, your shelters, your support groups and your play parties
until you realize that

we are part of your communities.

Until you realize that your liberation is tied up with ours.

Until you realize that trans is more than the "T" on the end of GLBT.

Until you realize the endless ways that
transphobia limits and hurts all of us, trans-identified or not.

We are going to breathe fire into your lungs
and light it under your ass:

We are the s/heroes of our own movement--join us--
the trans revolution begins here and now.

**A million genders for a million people!
smash the binary gender system!**

Fun Fact #1:

The gender binary is not biological.

"Are you a man because you have an XY chromosome? A woman because you have XX? Unless you're an athlete who's been challenged in the area of gender representation, you probably haven't had a chromosome test to determine your gender. If you haven't had that test, then how do you know what gender you are, and how do you know what gender your romantic or sexual partner is? There are, in addition to the XX and XY pairs, some other commonly-occurring sets of gender chromosomes, including XXY, XXX, YYY, XYY, and XO."

Fun Fact #2:

We have outgrown two genders.

"What does a man feel like?
What does a woman feel like?
Do you feel 'like a man?'
Do you feel 'like a woman?'"

Kate Bornstein, Gender Outlaw

**Fun Fact #3:
Gender enforces
patriarchy enforces
war.**

Why are men encouraged to watch dogfights, and women encouraged to get makeovers? Why are strong men called heroes, and strong women called bitches? What would happen if boys were allowed to play with dolls?

**Fun Fact #4:
Boys are allowed to
play with dolls.**
